FreezerMates provides the perfect solution as it seals in the freshness and reduces contamination - all while keeping food fresh as the day it was bought.

- Made to withstand temperatures as low as -4°F/-20°C
- Wall thinness allows for fast freezing
- Keeps temperature constant to prevent freezer burns
- A variety of sizes for all your needs
- Rounded corners and recessed bottoms allow air to circulate through

Fresh freezer tips:

Avoid putting hot food in the freezer

If you cook some of your meals ahead of time, put it in the refrigerator to cool off completely before you stick it in the freezer.

Don't leave the door to the freezer open

Along the same lines, you don't want to stand in front of a freezer with the door open for long periods of time. This will cause the temperature in the freezer to rise, making it likely to rise above freezing.

Always thaw food in the refrigerator

Not on the countertop.

Keep temperatures below freezing

Freezer burns only occur if the temperature fluctuates above 0°F.

Watch the "Fresh as First Frozen" video here.

Meat NOT stored in the right environment

Flexible seal with tab for easy removal.

Filling up to the indicated fill line, allows sufficient room for expansion as food freezes.

Clear windows allow fast and easy identification.

Meat frozen in FREEZER MATE stays fresh and juicy
