How to Assemble

Put the first container on the table and apply the seal.

Take the second container and angle it so the tab on one end goes into the clip.

Link handle to the topmost container by attaching one end first to the side, and pressing lightly at the centre until a "click" is heard.

How to Disassemble

Gently pull the clip away from the tab on the top container. At the same time lift up on the container.

The container can then be removed from the clip on the other side just by pulling the container upward.

Detach handle from both ends of the container.

Goodbye bulky, hello sleek and stylish

Just click and go!

Versatile
Durable handle carries up to **6 containers** and **6kg** in weight

Snap on easily with a click!

Key features:

When not in use the handle can be stored in one of the containers so there is no fear of losing it.

3-stage filtration

- 1 Nano-Ceram wrap filter
- 2 Carbon block to purify
- 3 Bakuhan enhances water

The Nano Nature Water Filtration System is a unique 3-step system that Filters, Purifies and Enhances drinking water with its patented Nano-Ceram wrap, high-density activated carbon block and the therapeutic BAKUHAN rocks from Gifu Prefecture, Japan.

It provides clean quality water that:

- Removes 99.99% bacteria & viruses
- Reduces contaminants
- Increases pH value (increase alkalinity)
- Maintains the natural beneficial minerals of water

Bakuhan - the 'healing stone' of Japan

The enhancement tank in our NNWFS contains Bakuhan-seki. This mineral-rich volcanic rock found only in the Gifu prefecture is certified by the Japanese Ministry of Health for possessing natural therapeutic qualities.

When used in water, it:

- Releases the natural minerals within the stone
- Increases the pH level of water

Aging brings out lines and wrinkles

Why do we age?

External Factors:

Unhealthy diet: A diet high in simple carbohydrates produces enzymes that causes sagging skin & wrinkles

Pollution: Interferes with skin's ability to produce collagen & regulate moisture

Smoking: Cigarette smoke breaks down collagen & intensifies eye bag formation

Sun exposure: UV ray causes pigmentation, age spots & fine lines

Stress: Releases a type of chemical in the body that results in skin aging

Internal Factors:

- Skin loses elasticity
- Collagen production depletes with age
- Skin cell renewal rate slows down

All these factors expose our skin to **free radicals** that causes **oxidative stress** to cells, leading to:

DNA Damage

Collagen Breakdown

Prevention of renewal and regeneration of new skin cells

Renew skin youthfulness from within
